Patrick,

We are on it. Also, please let us know when we should expect to receive the information for smartboard locations.

Thanks,
Kaan

Josh, thanks for resending.

Kaan, please ensure these requirements are on the CDs. Thanks.

Subject: Fw: FERC Swing: Meeting

These are the security requirements we sent back in September last year that include camera locations.

Please see the attached for IT/AV/Sec preliminary planning. As for other questions, please see my comments below.

Also, we do not have detailed comments from Tuesday's presentation yet, but some initial feedback is that there is some concern with the entry ceiling treatment… the wood elements might be a little too much. I should be able to provide more feedback next week.

Danny,

In addition to FERC's approval and comments on the furniture typicals, we need the following information for our DID's prep.

- Slab high & slab high with insulation wall locations

Conference rooms should be slab high with insulation. The HR file room on the 1st floor should be slab high w/o insulation. All other partitions should be ceiling height.

- Door hardware requirements (passage function, storeroom function, etc.)
  Wellness rooms should have deadbolt locks with thumb knobs on the interior. Sliding doors should be able to accept locking mechanisms, but only limited locks will be installed.
- Security requirements (card reader& camera locations, is there a need or cypher lock)
  See Attachments
- Requirements for lighting controls in conference rooms (dimmable, different scenes, etc.)
  Only basic controls are required where AV monitors are provided, dimmable fixtures or dual switching to lower the lights at the monitor.
- Construction budget
  I believe this was discussed at the meeting.
- A direction as to how FERC wants their IDF/LAN room to be configured on each floor
  See Attachments

Thanks,
Kaan

Kaan,
Other than the furniture typical, is there any other items you're missing for the DID's prep?

Please advise.

Thanks

Hi Josh,

Can you please let us know if the revised furniture typicals provided by Unicor is approved?

Thanks,
Kaan

Danny,

We will not have any drawings for review or approval since we have been waiting for the FERC's requirements for IT, Telecomm, and A/V and Security to start working on the DID's. Please let us know when we should expect to receive them.

Also, please let us know if there is any update on furniture?

Thanks,
Kaan
